## Profession

2017-current *Software Engineer* @ Istituto Italiano di Tecnologia (IIT), Genoa, Italy www – Development and maintenance of robot real-time control frameworks and communication systems with EtherCAT. Software architecture development with the integration of control modules in current frameworks to make the robots capable of executing tasks in complex environments. Open source code adaptation, ROS and ROS packages integration on the robots. DevOps processes: create and maintain fully automated CI/CD pipelines for code deployment using GitLab-CI, apt servers and Docker containers. Development of software for safety to protect robot hardware and operators. Development and integration of GUI to interact with the robot. Cooperation with external work groups (mainly Vodafone and Inail) in the development of robot software.

03/2017-08/2017 *Post-Doc* @ at Robotics and Mechatronics group, University of Twente, Enschede, The Netherlands. www - Development of a Safety and Energy aware impedance controller for a KUKA LWR 4+. Students supervision in the laboratories.

2012-2013 *Research Engineer in Motion Control of Humanoid Robots* @ PAL Robotics S.L., Barcelona, Spain. www - Development, testing and design of ROS-Control and ROS-Controllers to implement a Hardware Abstraction Layer for different kind of robots (humanoids, manipulators and mobile robots). Implementation through ROS-Control of an inverse kinematics solver with tasks optimization for REEM-H and REEM-C robots.

2012 *Internship* @ ENSTA-ParisTech and UPMC-ISIR, Paris, France. www - Development of a library in Matlab and C++ to generate Motion Primitives and perform Skills Optimization for humanoid robots (MEKA, NAO, ICub and Pepper). Maintenance of MEKA robot libraries.
